# Flight Testing Newton's Laws

Student's Flight Manual

Table of Contents

	Page
<b>Preface</b> -----	<i>i</i>
<b>National Science Education Standards</b> -----	<i>ii</i>
<b>Curriculum Standards for School Mathematics</b> -----	<i>ii</i>
<b>References</b> -----	<i>iii</i>
<b>Acknowledgments</b> -----	<i>iii</i>
<b>1 Review of Newton's Laws of Motion</b>	
1.0 Importance of Physics -----	1.1
2.0 Newton's First Law -----	1.2
3.0 Newton's Second Law -----	1.2
4.0 Newton's Third Law -----	1.4
5.0 Summary -----	1.5
6.0 Measures of Performance -----	1.5
7.0 Example -----	1.5
8.0 Suggested Activities -----	1.5
Operational Supplement -----	1.6
<b>2 Weight and Balance</b>	
1.0 Definitions -----	2.1
2.0 Balancing Forces and Moments -----	2.1
3.0 Significance of Weight & Balance -----	2.2
4.0 Weighing An Aircraft -----	2.3
5.0 Measures of Performance -----	2.6
6.0 Suggested Activity -----	2.6
Operational Supplement -----	2.7
<b>3 Developing Lift</b>	
1.0 Definitions -----	3.1
2.0 Bernoulli's Equation -----	3.1
3.0 Lift and the Rate of Change of Momentum -----	3.2
4.0 Lift and the Bernoulli Equation -----	3.4
5.0 Summary -----	3.5
6.0 Measures of Performance -----	3.5
7.0 Example -----	3.5
8.0 Suggested Activity -----	3.6
<b>4 Developing Drag</b>	
1.0 Definitions -----	4.1
2.0 Introduction -----	4.1
3.0 Skin Friction -----	4.1
4.0 Pressure Drag -----	4.2
4.1 Causes of Pressure Drag -----	4.3
5.0 Summary -----	4.5
6.0 Measures of Performance -----	4.5
7.0 Suggested Activity -----	4.5
Operational Supplement -----	4.9

**5 Thrust**

1.0	Definitions	5.1
2.0	Introduction	5.1
3.0	Principles of Thrust	5.1
3.1	Propeller Aircraft	5.1
3.2	Jet Engines	5.3
4.0	Summary	5.5
5.0	Measures of Performance	5.5
6.0	Problems	5.5

**6 Takeoff Performance**

1.0	Definitions	6.1
2.0	Introduction	6.1
3.0	Test Aircraft Description	6.1
4.0	Determining the Takeoff Speed	6.1
5.0	Determining the Drag	6.2
6.0	Determining the Acceleration	6.2
7.0	Determining the Takeoff Distance	6.3
8.0	Rolling Friction	6.3
9.0	Summary	6.4
10.0	Measures of Performance	6.5
11.0	Example	6.5

**7 Climb and Descent Performance**

1.0	Definitions	7.1
2.0	Introduction	7.1
3.0	Theory	7.1
3.1	Simplifying Assumptions	7.1
3.2	Climb Rate vs Velocity	7.3
4.0	Power Method	7.3
5.0	Energy Method for Climb Performance	7.4
6.0	Data Analysis	7.4
7.0	Descents	7.5
8.0	Summary	7.5
9.0	Measures of Performance	7.5

**8 Cruise Performance**

1.0	Definitions	8.1
2.0	Introduction	8.1
3.0	What is Range Performance?	8.1
4.0	Determining the Maximum Endurance Airspeed	8.2
5.0	Determining the Maximum Range Airspeed	8.5
6.0	How to Keep the Cruise Speed High	8.6
7.0	Flight Testing Cruise Performance	8.6
8.0	Summary	8.7
9.0	Measures of Performance	8.7
10.0	Problems	8.7

<b>9</b>	<b>Landing</b>	
1.0	Definitions -----	9.1
2.0	Introduction -----	9.1
3.0	Theory -----	9.1
3.1	Descents -----	9.1
3.2	Approach -----	9.2
3.3	Flare -----	9.3
3.4	Rollout -----	9.4
4.0	Summary -----	9.6
5.0	Measures of Performance -----	9.6
6.0	Suggested Activities -----	9.7
<b>10</b>	<b>Summary and Review</b>	
1.0	Introduction -----	10.1
2.0	Weight and Balance of the Model -----	10.1
3.0	Determining Thrust of the Model -----	10.2
4.0	Determining Takeoff Speed -----	10.2
5.0	Determining the Drag -----	10.3
6.0	Determining the Acceleration -----	10.3
7.0	Determining Takeoff Distance -----	10.4
8.0	Conclusion -----	10.5
